## 谷歌浏览器升级新版本后,不打印的解决办法 (打印插件已启动)

## 1、打开chrome://flags/#site-isolation-trial-opt-out

	Chrome	chrome://flags/#site-isolation-trial-opt-out	₫ ☆
		Q Search flags	Reset all
		Disable site isolation Disables site isolation (SitePerProcess, IsolateOrigins, etc). Intended for diagnosing bugs that may be due to out-of-process iframes. Opt-out has no effect if site isolation is force- enabled using a command line switch or using an enterprise policy. Caution: this disables important mitigations for the Spectre CPU vulnerability affecting most computers. – Mac, Windows, Linux, ChromeOS, Android, Fuchsia, Lacros #site-isolation-trial-opt-out	Default 🗸
		Site isolation for <webview> tags Enables site isolation for content rendered inside <webview> tags. This increases security for Chrome Apps and WebUI pages that use <webview>. – Mac, Windows, Linux, ChromeOS, Fuchsia, Lacros #enable-webview-tag-site-isolation</webview></webview></webview>	Default 🗸
		Allow invalid certificates for resources loaded from localhost.	
卡印夫		Allows requests to localhost over HTTPS even when an invalid certificate is presented. – Mac, Windows, Linux, ChromeOS, Android, Fuchsia, Lacros	Disabled 🗸
、搜索日	Block insecu	Allows requests to localhost over HTTPS even when an invalid certificate is presented Mac, Windows, Linux, ChromeOS, Android, Fuchsia, Lacros re private network requests,设置disabled	Disabled V
